

Take control of your waste!

Agritel supplies crushing and baling machines for a wide variety of waste material. Compacted waste is easier to handle, cheaper to transport, and widely accepted by recyclers.

Used as part of a simple waste management regime, Ag-mac machines help increase efficiency, improve recycling rates and dramatically reduce the cost of waste disposal.

Contact our friendly and knowledgeable staff to find out how an Ag-mac machine can benefit your business!

Ag-mac BP11 Bin Press

The Ag-mac BP11 packs an impressive compaction ratio of up to 3:1 (depending on material) to maximise utilisation of 1100-litre waste bins. Reduced frequency of emptying – and/or fewer bins – improves efficiency and can deliver real cost-savings.

Like all Ag-mac machines, the BP11 Bin Press is safe and simple to use, and robustly engineered for long-term rugged performance. It can be sited outdoors, but we recommend that a rain shelter is provided to prolong the life of the machine and improve operator comfort.

- Reduces the frequency of waste bin collections
- Reduces the cost of waste disposal!

Features

- Compaction ratio of up to 3:1
- Base plate ensures that bin wheels are not damaged during compaction
- Two-handed operation for safety
- 12-month manufacturer's warranty

Optional Extras

- Crush plate to suit 660-litre bin

Technical Specification	Ag-mac BP11 Bin Press
Compaction ratio (max)	3:1
Press force (max)	3.5 tonnes
Machine weight	270kg
Cycle time	20 seconds
Noise level	72 decibels
Power supply	1.5kW 13A 220-230V
Dimensions (HxWxD)	2120 x 1160 x 1150mm
